#### Abstract

A short summary of what is going on here.

### Deutsche Zusammenfassung

Kurze Inhaltsangabe auf deutsch.

## Contents

1.	Introduction	1
2.	Preliminaries	3
3.	Content Chapters         3.1. Section 1          3.1.1. Subsection 1          3.1.1.1. Subsubsection 1	Ę
4.	Conclusion	7
Bi	ibliography	g
-	ppendix A. Appendix Section 1	11 11

## 1. Introduction

This chapter should contain

- 1. A short description of the thesis topic and its background.
- 2. An overview of related work in this field.
- 3. Contributions of the thesis.
- 4. Outline of the thesis.

# 2. Preliminaries

This chapter should provide the foundations of the thesis.

## 3. Content Chapters

The content chapters of your thesis should of course be renamed. How many chapters you need to write depends on your thesis and cannot be said in general.

#### **3.1.** Section 1

. . .

#### 3.1.1. Subsection 1

. .

#### 3.1.1.1. Subsubsection 1

. . .

#### Paragraph 1

. . .

**Subparagraph 1** Always reference figures, tables etc. To give a few simple examples, this section contains Algorithm 3.1, Table 3.1, Figure 3.1, and Theorem 3.1. To give an example citation we recommend the book of Garey and Johnson [GJ79].

Theorem 3.1. Wer das liest ist doof.

*Proof.* Weil ist so.  $\Box$ 

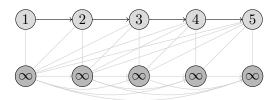

Figure 3.1.: A funny graph.

#### Algorithm 3.1: DIJKSTRA

```
Input: Graph G = (V, E, \omega), source node s
   Data: Priority queue Q
   Output: Distances d(v) for all v \in V, shortest-path tree of s given by pred(\cdot)
   // Initialization
1 forall v \in V do
       d(v) \leftarrow \infty
    \mathsf{pred}(v) \leftarrow \mathtt{null}
4 Q.INSERT(s,0)
\mathsf{5} \; \mathsf{d}(s) \leftarrow 0
   // Main loop
6 while Q is not empty do
        u \leftarrow \mathsf{Q}.\mathsf{DELETEMin}()
        forall (u, v) \in E do
            if d(u) + \omega(u, v) < d(v) then
 9
                \mathsf{d}(v) \leftarrow \mathsf{d}(u) + \omega(u,v)
10
                pred(v) \leftarrow u
11
                if Q.CONTAINS(v) then
12
                  Q.DECREASEKEY(v, d(v))
13
                else
14
                  Q.INSERT(v, d(v))
15
```

Table 3.1.: Some strange numbers.

First column	Second column
3 109 218 136	3208415108
2231385058	1959477358
1287719872	1317165206
2516844936	2630583944
1569466774	1636507220
1032627816	991322491

## 4. Conclusion

Summary and outlook.
